

I pay for the ability to be able to get traffic and weather updates in traffic and weather-bound Houston, Texas. I'm on the road for at least 3 hours every day. Given the high price of gasoline, every bit of information helps to reduce traffic congestion and wasting energy fuel and my time. Commercial radio cannot possibly include all the detailed and up to date information I need to navigate the streets and highways of Houston safely and easily.

Please reject NAB Petition 04-160
